# FOREWORD

The publication is an English version of the Finnish Railway Statistics 2010. It contains statistical data on railway network and railway traffic in Finland.

The publication is published by the Finnish Transport Agency, which was formed on 1 January 2010 as the Finnish Rail Administration, the waterways functions of the Finnish Maritime Administration and the central administration of the Finnish Road Administration merged.

The publication has been prepared by Harri Lahelma, Finnish Transport Agency, and Vesa Juuti, VR-Group Ltd.

Helsinki, September 2010

## CONCEPTIONS

Length of line	= total length of main and secondary lines excluding sidings
Track length	= total length of main and secondary tracks including sidings
Train-kilometre	= distance of one kilometre covered by the train
Gross ton-kilometres	= total gross weight of the locomotive and the carrying stock of a train in tons X corresponding train-kilometres
Gross ton-kilometres hauled	= gross weight of the carrying stock of a train in tons X corresponding train-kilometres
Vehicle-axle-kilometres	= number of axles of the vehicles of a train X corresponding train-kilometres
Locomotive-kilometre	= distance of one kilometre covered by the locomotive
Passenger-kilometre	= distance of one kilometre covered by the passenger
Tonne-kilometre	= one conveyance kilometre of one ton of goods

The following symbols have been used in the tables:

"	= repetition
—	= nothing to indicate
0 or 0.0	= the quantity is smaller than half of the unit used
..	= information not available
.	= category not applicable

A horizontal line drawn across a time series shows substantial breaks in the homogeneity of a series.
